EDUCATION

Yeshwantrao Chavan College of Engineering

B.Tech in Computer Science and Engineering, Minor in Robotics and CIM, CGPA: 9.01

Nagpur, India

July 2023 – June 2027

PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in AI/ML with experience in applied machine learning and intelligent systems. Focused on building scalable, data-driven solutions with exposure to modern development and DevOps workflows.

EXPERIENCE

Intern

June 2025 – July 2025

63 Moons Technologies Ltd.

Mumbai, India

- Developed an end-to-end Legal Entity Extraction (NER) pipeline using spaCy and Doccano, automating extraction of petitioners, respondents, judges, and dates from 1000+ High Court judgments, reducing manual processing time by 70%.
- Contributed to multiple AI initiatives including District Court APIs, Judicial Gateway, LegalGPT, and a speech-to-text pipeline using Whisper and Azure, processing 500+ audio files for legal transcription.
- Implemented LangChain-based RAG workflows, integrated vector databases (ChromaDB), and optimized LLM performance, improving query response time by 30%.
- Worked with FastAPI, PostgreSQL, Redis, Kafka, Docker, and Kubernetes, documenting workflows and supporting scalable system design.

PROJECTS

ArchIntel | Python, Machine Learning, Computer Vision, NLP | [GitHub Link](#)

- Analyzed 5,000+ floor plans (CubiCasa5K) using computer vision-based SVG parsing for room segmentation, spatial graph construction, and geometric feature extraction.
- Engineered 25 spatial and functional features (circulation, zoning, adjacency, spatial syntax) to quantify layout efficiency.
- Developed a Design Quality Index (DQI) to benchmark architectural performance across multiple dimensions.
- Built an LLM-powered assistant (RAG + rule-based) to interpret metrics and generate actionable design improvement suggestions.

Legal Entity Extraction (NER) Pipeline | spaCy, Doccano, Python | [GitHub Link](#)

- Built an end-to-end NLP pipeline to extract Petitioner, Respondent, Judge (Coram), and Order Date from 1000+ High Court judgments.
- Automated workflow: PDF download → text cleaning → Doccano annotation → custom spaCy NER training → evaluation, reducing manual effort by 70%.
- Achieved >85% F1-score, outperforming regex-based and generic NER models.
- Improved preprocessing with OCR artifact cleaning and rule-based refinements for complex legal text.

TECHNICAL SKILLS

Programming & Scripting: Python, C, C++, Java, JavaScript

AI/ML & NLP: spaCy, LangChain, Whisper, OpenIE, OCR pipelines, RAG workflows, Anaconda

Web & Backend: FastAPI, Node.js, Express, React, Next.js

Databases: PostgreSQL, ChromaDB, Neo4j

DevOps & Cloud: Docker, Kubernetes, CI/CD basics, Azure

Tools: Doccano, Jupyter Notebook, Figma

ACHIEVEMENTS & LEADERSHIP

Smart India Hackathon (SIH) 2025 Finalist — Built an AI-driven eDNA taxonomy system using DNABERT, UMAP, and HDBSCAN for unsupervised species clustering; integrated BLAST-based validation to identify novel taxa and quantify biodiversity abundance.

Joint Treasurer, C.O.S.M.O.S. (CSE Dept.)

2025–26

High Recommendation, Order of Zenith — Maharashtra Legislative Assembly

Special Mention — YCCExMUN (AIPPM Committee)

Goethe Zertifikat A1 (German Language) — Scored 81%
